Objective

Head of SRE & Application Support with 8+ years of experience leading robust site reliability, cloud operations, and scalable infrastructure systems. Proficient in **Terraform, Ansible, Prometheus, and Grafana for 24/7 uptime**. Strong background in **incident management, MTTR optimization, and automating** complex Martech/SaaS workflows at scale. **Passionate about high-availability** engineering.

Experience

Infosys Limited | Head of SRE & Application Support July 2025-Present

- **Lead the SRE** team to enhance uptime of Martech tools; architected robust infrastructure **strategies** ensuring high availability on cloud platforms, significantly optimizing MTTR through **automated root cause analysis**.
- **Managed** customer-facing application health; developed standardized debugging processes and escalation **matrices, reducing critical incident resolution time by** structuring **team** coverage.
- **Implemented** Infrastructure as Code (Terraform/Ansible) to scale operations; established **robust SLOs and SLAs** to ensure **system performance and** reliability for key enterprise clients.
- **Orchestrated** monitoring systems (Prometheus/Grafana); conducted **post-mortems and risk assessments** to prevent recurring technical outages and **enforce security compliance**.
- **Collaborated** with product teams for PI planning; mentored **engineers in DevOps** best practices, **fostering** a culture of continuous improvement, automation, and **open-source contribution**.

Projects

Infrastructure Reliability Initiative | Terraform, Ansible, Prometheus, Grafana, Python, Linux Jan 2025

- **Problem:** Manual scaling and fragmented monitoring caused 2+ hr incident recovery times.
- **Architected** an end-to-end **RAG** pipeline: **ingested** HR policy PDFs → chunked with **RecursiveCharacterTextSplitter** → **embedded** via **OpenAI**-compatible API → stored in **Qdrant** vector DB with **metadata** filters for department-scoped retrieval.
- **Integrated** end-to-end observability → Prometheus/Grafana alerts → automated incident **triage logs** → **PagerDuty** integration → **auto-scaling trigger, reducing downtime**.
- **Optimized** cloud cost and performance via **automated script execution for** resource pruning and **predictive capacity planning** techniques, resulting in a 25% cost reduction.
- **Achieved** 99.99% availability on 95th percentile via redundant cluster management and automated failover routines.

Skills

SRE Leadership: Incident Management, SLO/SLA Strategy, Capacity Planning, Post-Mortems, Mentorship

Cloud & DevOps: AWS, GCP, Linux/Unix, Terraform, Ansible, CI/CD Pipelines, Git, Docker, Kubernetes

Monitoring & Ops: Prometheus, Grafana, ELK Stack, Log Management, Alerting, Performance Tuning

Backend & Coding: Python, PHP, Golang, Java, REST APIs, Scalable Microservices Architecture

Process Improvement: Open-source Contribution, Risk Mitigation, Automated Debugging, PI Planning

Languages: Python, Go, Java, Bash, SQL

Achievements

- **Leetcode (Max Rating 1797)** | Top 5% in India Among 100,000 active users.  [Leetcode](#)
- **3 Star - Codechef (Max Rating 1628)** | Top 5% Among 170K+ Active Users  [Codechef](#)
- **Pupil - Codeforces (Max Rating 1206)** | Top 10% Among 70K+ Active Users  [Codeforces](#)
- **1st Place in VNPS** | National Level Project Showcase
- **3rd place in CodeCraze** | Data Structures and Algorithm Implementation Based Competition

Education

Vidyavardhini's College of Engineering And Technology

May 2025

Bachelor of Engineering in Computer Science - **CGPA - 8.5**
