Objective

.NET Software Engineer with expertise in full-stack development, **C#, ASP.Net, and SQL Server technologies**, building **scalable,high-performance enterprise applications**. Proficient in **C#, ASP.Net Core**, and **SQL Server database design**. Strong foundation in **software development principles,object-oriented design,and full-stack architecture**.Passionate about **delivering robust,low-latency solutions** at scale.

Experience

Infosys Limited | .NET Software Engineer

July 2025-Present

- **Designed** and developed high-quality **software applications** using **.NET technologies** and **C# / ASP.Net** for enterprise-grade systems, enabling rapid development of scalable web solutions **for cross-functional teams**.
- **Collaborated** with cross-functional teams to identify **project requirements**, utilizing **Agile/Scrum methodologies** to streamline feature delivery and ensure alignment with business goals.
- **Implemented SQL Server** queries and stored procedures (replacing inefficient methods) for **scalable data operations; database indexing and query execution plans** to improve application performance by ~30%.
- **Maintained code** quality using **standardized coding practices**; participated in **code reviews** and **unit testing** to reduce **technical debt** and **enforce enterprise architecture compliance**.
- **Troubleshoot** technical issues efficiently using debugging tools and CI/CD pipelines; integrated **monitoring tools** for **system performance, error tracking, and uptime reliability of .NET services**.

Projects

Enterprise Policy Dashboard | ASP.Net, C#, SQL Server, HTML, CSS, JavaScript

Jan 2025

- **Problem:** Internal teams faced **3+ hrs/day** in manual query bottlenecks; lack of centralized web-based solution.
- **Architected** an end-to-end **web application:** ingested policy data → modeled with **Entity Framework** → **managed in SQL Server DB** → exposed via **Web API** endpoints with **secure metadata** filtering for role-based department access.
- **Built** responsive front-end using **HTML/CSS/JavaScript** and **Bootstrap:** asynchronous data loading → dynamic UI rendering → seamless user experience → **form validation logic**, improving accessibility scores.
- **Developed C#** backend with **N-tier architecture** and **Dependency Injection** patterns; integrated **Logging** for full application telemetry **visibility** and execution tracking, reducing server response time by **25%** via **optimized database access layers**.
- **Achieved <800ms** end-to-end load time on **95th** percentile via async C# programming **and front-end** optimization.

Skills

Backend Development: .NET, C#, ASP.Net Core, Entity Framework, REST APIs, Web API, LINQ

Database & Data: SQL Server, T-SQL, Stored Procedures, Performance Tuning, Entity Framework, Schema Design

Frontend Development: HTML5, CSS3, JavaScript, Bootstrap, jQuery, Responsive Web Design

Software Principles: SOLID Principles, Design Patterns, Unit Testing, CI/CD, Agile/Scrum, Version Control

Problem Solving: Troubleshooting, Debugging, Code Reviews, Performance Optimization, Scalable Architecture

Languages: C#, SQL, JavaScript, HTML, CSS, Python, C++

Achievements

- **Leetcode (Max Rating 1797)** | Top 5% in India Among 100,000 active users.  [Leetcode](#)
- **3 Star - Codechef (Max Rating 1628)** | Top 5% Among 170K+ Active Users  [Codechef](#)
- **Pupil - Codeforces (Max Rating 1206)** | Top 10% Among 70K+ Active Users  [Codeforces](#)
- **1st Place in VNPS** | National Level Project Showcase
- **3rd place in CodeCraze** | Data Structures and Algorithm Implementation Based Competition

Education

Vidyavardhini's College of Engineering And Technology

May 2025

Bachelor of Engineering in Computer Science - CGPA - 8.5
